Noise Level Monitoring

- Personal monitoring to establish Time Weighted Average (TWA) exposures
- Multiple dosimeters utilized to render an extensive survey
- Area sampling to identify additional hazardous noise
- Contour mapping of noise levels to provide visual presentation of data
- Recommendations on program development and OSHA & MSHA compliance
- Survey documentation provided within 10 working days

On-site Hearing Testing

- Group testing of 8 employees every 20 minutes; 24 tests per hour; 200 tests per shift per rig
- Test administration enhanced by computerized technology
- Psychoacoustic test chamber with 4-inch composite walls engineered to meet OSHA, MSHA and ANSI requirements
- Ambient noise levels continuously monitored within the test chamber
- Equipment calibration verified on a daily basis
- Climate-controlled test chamber for year-round comfort
- All tests administered by CAOHC-certified professionals
- Each client routinely notified for annual testing
- Economical retesting visits available

Training and Education

- Education to include all components mandated by OSHA & MSHA
- Theater-like design to heighten employees' attention
- Training conducted by experienced and personable staff
- Video portion of training available in multiple languages
- Unique system to allow both education and hearing testing without changing position
- Employees off production line only once — for just 20 minutes!

Reporting and Data Management

- Clear and complete record-keeping package generated within 10 working days
- Management summary for program tracking
- Problem audiograms flagged for appropriate follow-up (standard threshold shifts, OSHA or MSHA recordables, referrals, etc.)
- Two sets of letters to management for individual employee notification
- Otological history maintained on each employee
- Documentation to assist with development of written program
- Baseline audiograms incorporated from any source
- All records electronically archived in multiple locations

Consultation and Review

- On-site management consultation and report delivery for new programs
- Audiograms reviewed by certified audiologist
- Evaluation of noise reduction ratings on hearing protection
- Additional consultation products and services:
 - molded earplugs
 - equipment sales and calibration
 - record-keeping software
 - customized educational sessions

CAOHC Training Center

Industrial Hearing Testing provides courses for safety professionals who wish to obtain CAOHC (Council of Occupational Hearing Conservation) certification.

- Initial certification requires 20 classroom hours
- Re-certification required every 5 years; 8 classroom hours
- Comfortable classroom located in IHT corporate headquarters

Established in 1983, Industrial Hearing Testing (IHT) is the most experienced hearing testing company in the Northeast. We are the leader in providing comprehensive Hearing Conservation Programs for industrial manufacturers. Our services are designed to help industrial clients comply with the Hearing Conservation Standard, OSHA's 29 CFR 1910.95 and MSHA's 30 CFR 62. IHT strives to provide the highest-quality service available by constantly improving our technological capabilities, as well as the performance of our staff. Each professional member of our team is certified by the Council of Accreditation in Occupational Hearing Conservation (CAOHC) and is always available to serve you.

I hope you will allow us an opportunity to demonstrate our high level of service, professionalism and expertise.
